Copilot+ PC

STEALTH AI6 AI+

NEXT-LEVEL AI PC

SLIM · SHARP · STYLISH

*Copilot+ PC experiences are coming. Requires free updates available starting late November 2024. Timing varies by device and region. See aka.ms/copilotpluspcs

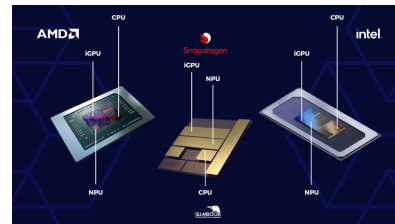

The neural processing unit (**NPU**) designed within of a device has architecture that simulates a human brain's neural network. It is what make an AI PC possible.

Integrated with with the latest Intel Core Ultra or AMD Ryzen 8040 and higher Processor, A new era of AI PC computing is here.

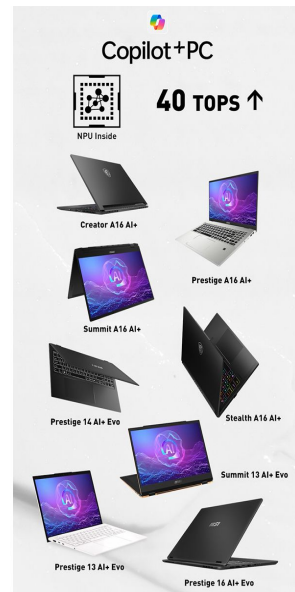

And combine with latest generation Nvidia Blackwell GPU designed within MSI high performance class PCs, MSI offers full stack of client devices from everyday computing to AI Research and Development to rich media content creation

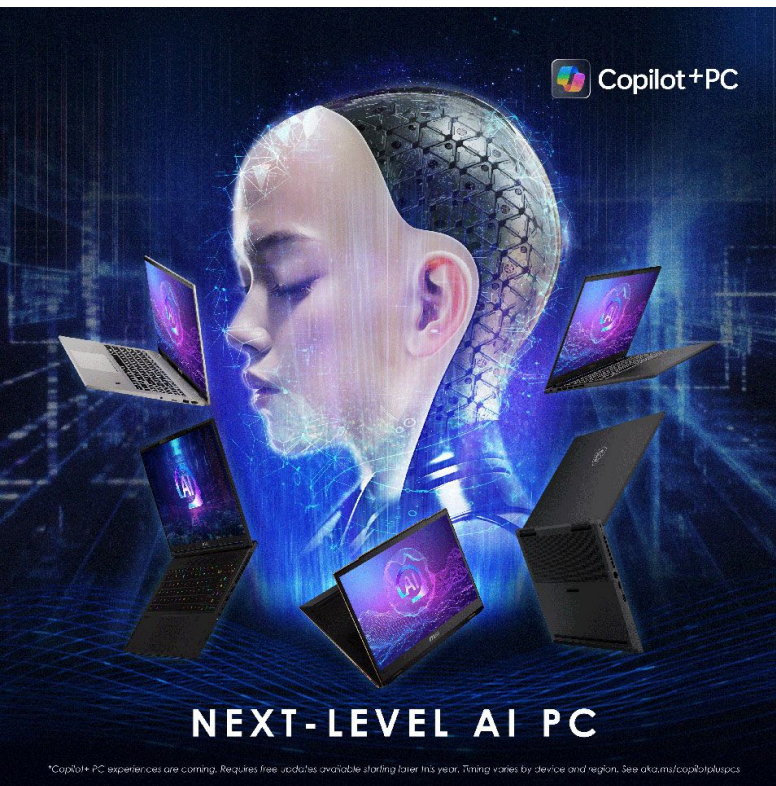

- Processes large amounts of data in parallel, performing trillions of operations per second.
- Uses less power and is far more efficient at AI tasks than a CPU or GPU.
- Excels at AI tasks and frees up the CPU and GPU for other tasks. Combining an NPU with machine learning gives you a powerful combo.
- Provides lightning-fast, high-bandwidth AI in real time—a great advantage for using voice commands, creating images quickly, and more.
- Helps you work fast and be more creative.

What is an AI PC?

MSI AI PC Optimized for Generative AI Market Ecosystem Application

*Copilot+ PC experiences are coming. Requires free updates available starting later this year. Timing varies by device and region. See aka.ms/copilot+pc

Optimize Productivity with MSI Endpoint AI PC Device

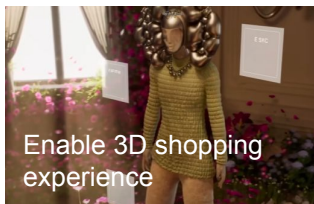

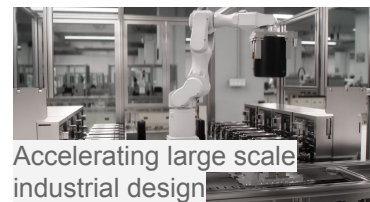

- Higher security for sensitive data
- AI in video conferencing enhances meetings - real-time transcription, noise cancellation, automatic translation
- Enhanced Education AI Learning Experience
- Real-time language translation

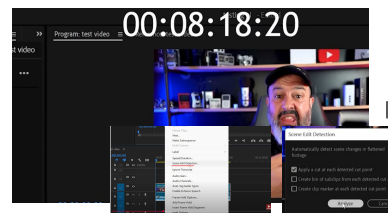

- Faster time Video & Photo editing
- Exponential Inference performance
- Best Gaming Experience
- Excel in handling AI tasks

What can MSI AI PC do more for me?

Keep your data locally for confidential materials and design content protected from security breach over the cloud

2.1 GB Size Video

1m

Reduce AI transcribe from Video to text by 8X to 15X

MSI AI mobile workstations amplifying creativity and accelerating innovation across industries including Autodesk AI workflow to unleash their creativity within for the architects, engineers, and visual content designers

Autodesk AI for your industry

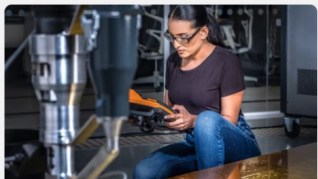

Architects & engineers

From real-time environmental analyses in Forma to faster iterations in AutoCAD, Autodesk AI empowers architects and engineers to deliver projects with sustainable outcomes.

Construction

Autodesk AI helps construction teams predict and prevent risk, improve decision making, save time with assistive workflows, and access project information faster and earlier.

Design & manufacturing

From the top floor to the shop floor, Autodesk AI is integrated into every part of the design and manufacturing process, automating tedious work and freeing your teams to innovate.

Media and entertainment

The journey should be as fulfilling as the final product. Autodesk AI empowers artists to focus on creativity while enabling production teams to boost productivity.

[Click for demonstration video](#)

Automate, analyze, and augment your Design and Make workflows with Autodesk AI

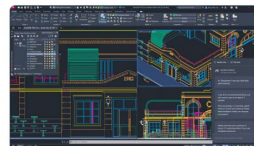

Autodesk AI technology enables capabilities in Autodesk's Design and Make Platform and other Autodesk products, with more coming every day.

AUTODESK FORMA

Real-time analysis

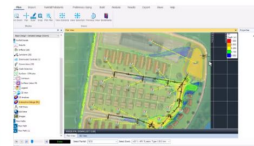

Perform predictive analysis for wind, noise, and embodied carbon in real time, so you can make smart design decisions that improve outcomes.

AUTODESK AUTOCAD

Autodesk Assistant

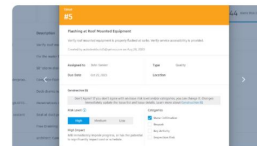

Use conversational AI to conveniently access helpful AI-generated support and solutions related to AutoCAD.

AUTODESK INFODRAINAGE

Machine learning deluge tool

Predict flood maps quickly and accurately when applying water on the site surface, while also highlighting the best spots for storage structures and stormwater controls like ponds and swales.

AUTODESK CONSTRUCTION CLOUD

Construction IQ

Analyze project data to identify and prioritize design, quality, safety, and project control risks to help resolve issues and make decisions earlier.

AUTODESK CONSTRUCTION CLOUD

Symbol detection

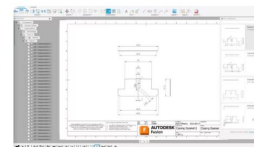

Estimators spend a lot of time manually identifying and counting symbols in drawings during quantity takeoffs. With automated symbol detection, users trace one symbol and Autodesk AI automatically detects and counts the same symbol on a drawing.

AUTODESK CONSTRUCTION CLOUD

Automated submittal logs

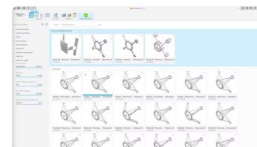

The process for creating submittal logs is error-prone and time-consuming, taking weeks to produce. Autodesk AI automatically reads through specification documents and generates a submittal log within minutes.

AUTODESK FUSION

Drawing automation

Automate 2D documentation with interactive experiences of manufacturing drawings, reducing time spent on non-value tasks.

AUTODESK FUSION

Generative design

Explore more design options with one workflow that uses manufacturing process-aware criteria, without the need to model and validate each.

Business & Productivity AI Client Mobile PC Device

AI for Gamers

Gaming Powered by Nvidia AI

Level up your gaming experience with RTX and AI-powered technology by MSI AI gaming PC enhancing everything from frame rates to fidelity. Plus, enjoy portable, powerful laptops with AI-powered Max-Q technologies to optimize your laptop's performance.

Supreme Speed. Superior Visuals.

DLSS is a revolutionary suite of neural rendering technologies that uses AI to boost FPS, reduce latency, and improve image quality.

Shaping the World of Competitive Gaming

From enhancing player performance and analysing gameplay to revolutionising broadcasting and audience engagement.

Powerful, Portable, and Quiet

Supercharge your laptop with the advanced Max-Q suite of AI-powered technologies that optimize your performance, power, and acoustics for peak efficiency.

Business & Productivity AI Client Mini PC PC Device

Replace Outdated Devices for Improved Performance With AI PCs

AI is already transforming the way people work and how businesses operate today, and that change is only going to accelerate. Now is the time to future-proof your device fleet with AI PCs powered by MSI to position your business — and your employees — for all the performance, efficiency and security advantages AI offers.

Measuring just 0.826 liters, the Cubi NUC AI+ 2M sets a new standard for mini PCs. Compact size yet powered by an Intel Core Ultra Processor from the Lunar Lake platform and comes with AI tools designed to enhance productivity and improve the user experience. Equipped with a dedicated AI Boost NPU, it functions as a Copilot+ PC, seamlessly integrating with AI-driven applications like CoCreator, Windows Studio Effects, Live Captions, and Live Translation—making it ideal for both professional and personal use.

One of its standout features is the one-touch fingerprint power button, which provides both security and convenience. Additionally, a dedicated Copilot button offers instant access to AI assistance, streamlining workflows and daily tasks. The built-in microphone and speaker further enrich the user experience, enabling smooth communication and voice-activated commands. Connectivity is another strong point, with two Thunderbolt™ 4 ports, one of which supports up to 100W Power Delivery input. This means the Cubi NUC AI+ 2M can be powered directly through a monitor using a Type-C connection, minimizing cable clutter and simplifying your setup.
